

SCINTILLA ECO-STAR

Our **Scintilla Eco-Star** allows you to grill without being exposed to the direct heat of the fire.

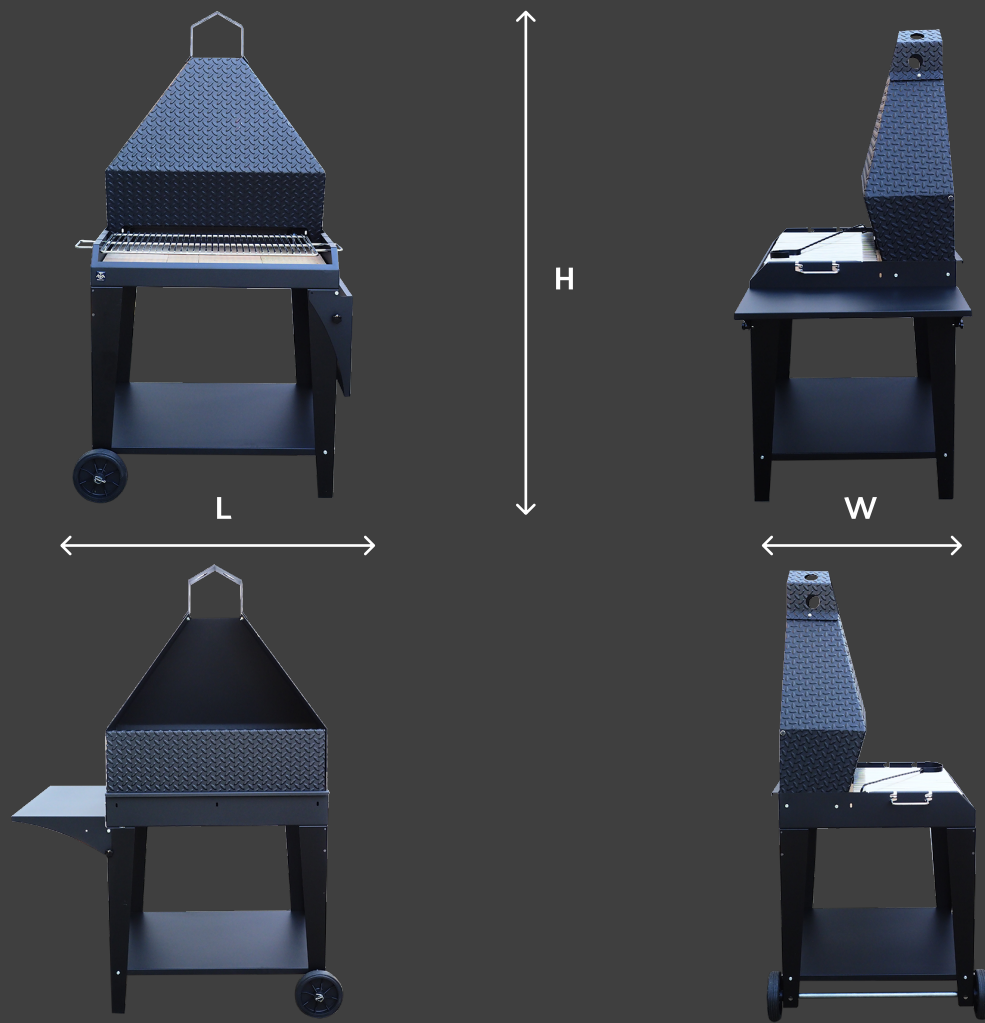

In **black painted steel**, Scintilla Eco-Star is equipped with **practical wheels** to be moved anywhere and a **side worktop** to place everything you need.

Totally dismantlable, it is shipped in a practical assembly kit with **grill, wood burner and oven rake** as standard.

The loading and unloading of the wood is **hidden in the back**, allowing you to keep the fire active without having to go over the grill: **safe and hygienic**.

In fact, not only will you avoid unpleasant burns, but any dirt residues - typical of wood - will not come into contact with food.
